Introduction:

Software developer for a year with experience in various technologies, check out my portfolio for more of my work!

Summary : Highly motivated and results-oriented software developer with 1+ year of experience building engaging and user-friendly web applications. Skilled in a variety of technologies including front-end, back-end, and mobile development. Eager to contribute to a team environment and continuously learn new technologies.

Technical Skills:

Front-End: HTML, CSS (Preprocessors like Tailwind CSS), JavaScript (TypeScript), React, Progressive Web Applications (PWAs), AI Models

Back-End: Node.js (Express.js), Mongoose (MongoDB), Firebase

Mobile: React Native, Python, Java, Rest, SQL

DevOps: Git, GitHub, Bitbucket, Webpack, Vite

Other: RESTful APIs, Webpack, Lighthouse (accessibility testing), Cloudinary (cloud storage), EmailUS Projects (Personal)

Introduction:

Java RPG Game

Currently developing an RPG game, developed in java. With NPCs, Character progression, leveling, and large world. This is more of a fun project, and help me develop my java skills more.

Twitter Clone:

Developed a Twitter-like platform using Next.js, Firebase, Tailwind CSS, and Redux. Implemented key features like user authentication, tweet creation, photo uploads, comment functionality, and differentiated experiences for logged-in and guest users

<https://twitter-clone-rka575j3m-wesman687s-projects.vercel.app/>

Spotify Clone:

Built a full-stack Spotify clone featuring music playback from user libraries using React. Integrated an admin page for content management.

Mile High (Full-Stack E-commerce): Built a comprehensive e-commerce website using React, Redux, Firebase, Mongoose, Express, Material UI, and Stripe payments. Implemented a backend server and admin dashboard for product management and order processing

<https://mile-high.vercel.app/>

Netflix Clone:

Developed a React-based Netflix clone with user authentication. Integrated YouTube for video search and playback.

<https://netflix-clone-6cnmwi081-wesman687s-projects.vercel.app/>

Gamer Search Platform:

Launched a platform utilizing an API to find games. Integrated news sections and detailed game information.
